TRUSTEES' REPORT

During the past school year expenses have run somewhat higher than anticipated due in large part to increased prices of all items. New equipment was received and installed that had been needed and ordered previously, but had not been obtainable. New sinks and an electric refrigerator were installed in the Home Economics room. A moving picture projector was received and according to all reports, has been enjoyed and used to a great advantage by the student body.

A hot lunch program was set up through the extensive efforts and cooperation of the Parent-Teachers Association. Approximately $1000. worth of equipment was purchased for this project, of which about $800. was received from state funds. Consequently we have some very worthwhile equip-

ment installed in our school which has cost the village itself very little money. This project has made hot lunches available to the students of whom approximately 140 have been served daily at a very nominal fee.

Cost of living bonuses were paid to all teachers, which we believe was justified and in line with what other communities have done during the past year.

The teachers' salaries for next year will necessarily be considerably higher due to laws which have been enacted by the legislature. The fact that the tuition rate for students attending from outside the school district and from other towns has been increased from $85. to $100. and State Aid will be higher will offset this additional teacher expense only partially and a somewhat higher tax will be required.

We are very hopeful that with the continued cooperation of the towns-people we will have another successful year, and would appreciate any suggestions for improvements that might be made so that these suggestions could be considered at regular monthly board meetings and if possible put into effect in our school.

Respectfully submitted,

WALTER HAYDEN,
KEITH O. LOMBARD,
ALAN M. ROUSE.
